

## Air Pressure Team Graph Day 2 - New York City

The graph below displays air pressure data for New York City on day 2. The data is recorded every hour.

Complete the graph by marking a dot on each hour. Ask your teacher for the data. Next draw a line to connect the dots. This makes a line graph.

Is the air pressure rising, falling, or staying about the same?

What type of weather do you think New York City is having on day 2?
